

A permanent underwater sound monitoring station in Belgian North Sea The Westhinder measurement pile experience

By Alain Norro (*) and Johan Vercruysse(**)

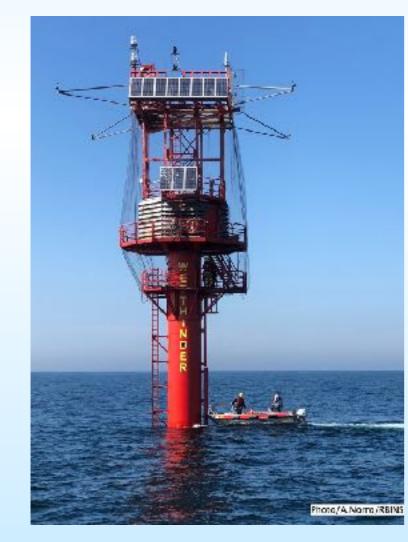

Royal Belgian Institute of Natural Sciences
OD-Nature
Rue Vautier, 29, 1000 Bruxelles, Belgium

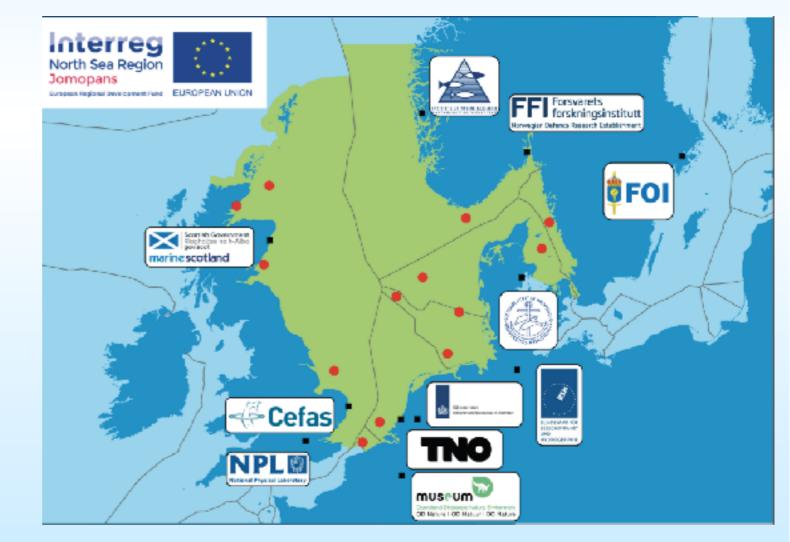

** MDK – Coastal Division-Flemish Hydrography

Vrijhavenstraat 3, 8400 Oostende, Belgium

JOMOPANS - Project (2018-2020)

- JOint Monitoring Programme for Ambient Noise North Sea
- for MSFD purposes D11C2 ambient sound, 13 measuring sites, one in Belgium water
- For the first time, a continuous measurement station was installed at Westhinder measuring pile end May 2019

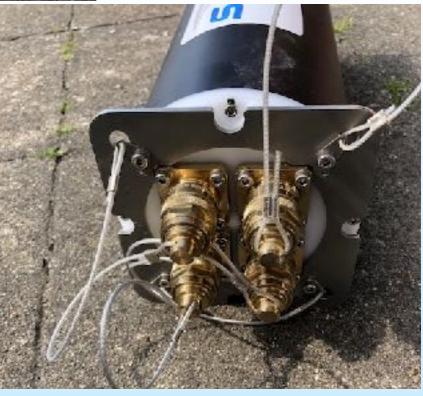

The Station RTsys EA-SDA-14 / Hydrophones B&K 8104

The Station RTsys EA-SDA-14 / Hydrophones B&K 8104

The Station RTsys EA-SDA-14 / Hydrophones B&K 8104

Cables are used to connect the station to the hydrophone One is close to the monopile (4 m depth) the other on is on the seafloor away from the pile and by 12 m depth

The Station RTsys EA-SDA-14 / Hydrophones B&K 8104

- System is Powered in 12 v (9 -14) ~ 6 w from the pile power station
- Transmission by VHF to the shore of a limited number of data every minute they are 95 percentile of 1/3 octave level at 63 Hz,125 Hz and 1kHz

Signal is amplified close by the hydrophone and not close to the recorder

Acquisition is made at 78125 Hz 24 bit signal

Hydrophones B&K 8104 connected to the recorder

Royal Belgian Institute of Natural Sciences
Operational Directorate for Natural Environments

The recorder can display real time data 'calibrated' in dB (Pa) or 'not calibrated' in dB(Volt)

Hydrophones B&K 8104 connected to the recorder

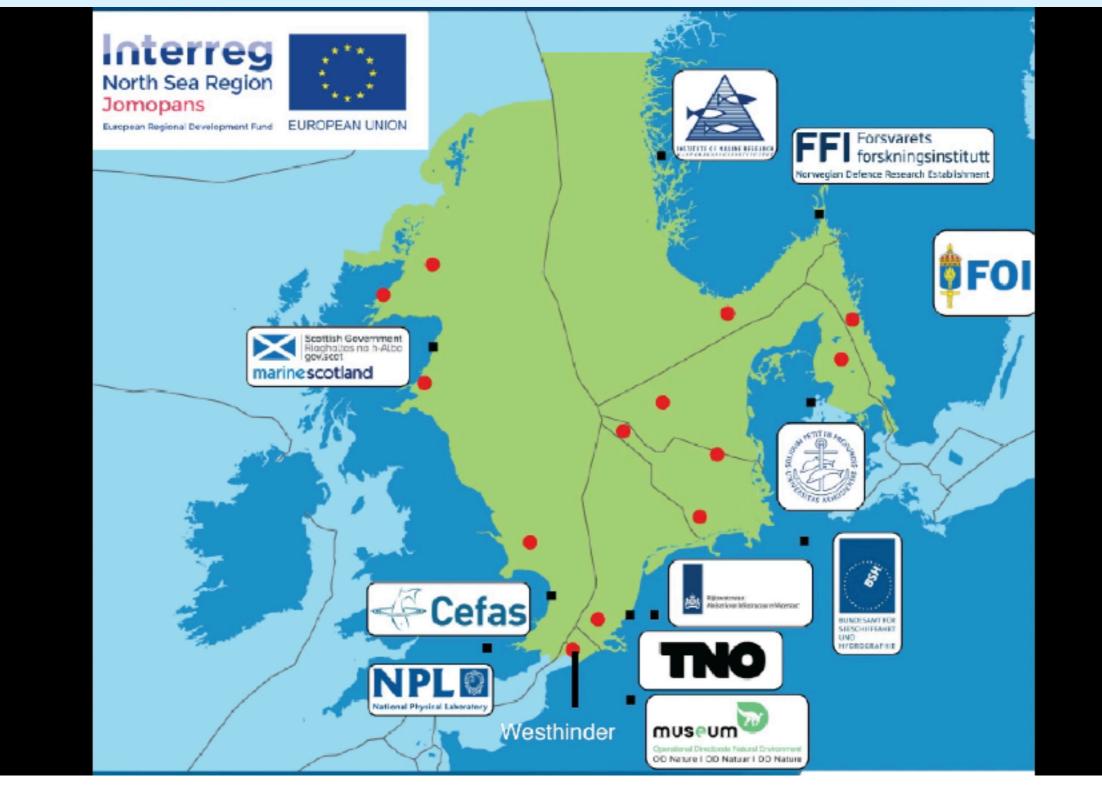

- Hydrophones are fully calibrated after manufacture by B&K
- Acquisition board is calibrated by RTsys after manufacture of the recorder (cross talk & frequency response of every channel)
- The complete system (hydro amplifier cable & acquisition board) calibration is further verified at 250Hz with a B&K pistonphone & B&K reference microphone

deployment

Information sent to the coast

• 95 Percentile of 1/3 Octave band 63 Hz & 125 Hz (D11C2) and 1 kHz

2019-06-01T22:16:00+00:00

116.00

• Size of both hard drive

• Raw data logged on 2 time 4 TB HDD on compressed format
